HUMAN ANATOMY AND PHYSIOLOGY

1. Which of these is true of the endocrine system?

- A. secretes hormones that are transported to target cells by blood
- B. causes changes in metabolic activities
- C. effects are prolonged
- D. All of above are true.

1. Which of these is true of the endocrine system?

- A. secretes hormones that are transported to target cells by blood
- B. causes changes in metabolic activities
- C. effects are prolonged
- D. All of above are true.**

2. Name the gland that is located at the base of the throat, just inferior to the laryngeal prominence (Adam's apple).

- A. Pituitary.
- B. Pineal gland.
- C. Hypothalamus.
- D. Thyroid

2. Name the gland that is located at the base of the throat, just inferior to the laryngeal prominence (Adam's apple).

- A. Pituitary.
- B. Pineal gland.
- C. Hypothalamus.
- D. Thyroid**

3. What gland is located just superior to the kidneys?

- A. Pituitary.
- B. Adrenal.
- C. Pancreas.
- D. ovaries

3. What gland is located just superior to the kidneys?

- A. Pituitary.
- B. Adrenal.**
- C. Pancreas.
- D. ovaries

4. Which drug may be prescribed to treat hypothyroidism?

- A. Pegvisomant
- B. Insulin
- C. Desmopressin
- D. Levothyroxine

4. Which drug may be prescribed to treat hypothyroidism?

A. Pegvisomant

B. Insulin

C. Desmopressin

D. Levothyroxine

5. In the pancreas, which are the cells that secrete insulin, decrease the blood levels of glucose.

- A. delta.
- B. alpha.
- C. beta.
- D. F

5. In the pancreas, which are the cells that secrete insulin, decrease the blood levels of glucose.

- A. delta.
- B. alpha.
- C. beta.**
- D. F

6. The endocrine gland responsible for the body's circadian rhythm is the:

- A. Thymus gland.
- B. Pineal gland.
- C. Parathyroid gland.
- D. Pituitary gland.

6. The endocrine gland responsible for the body's circadian rhythm is the:

- A. Thymus gland.
- B. Pineal gland.**
- C. Parathyroid gland.
- D. Pituitary gland.

7. Which condition results from over secretion of growth hormone?

- A. Panhypopituitarism
- B. Addison's
- C. Acromegaly
- D. Diabetes

7. Which condition results from over secretion of growth hormone?

A. Panhypopituitarism

B. Addison's

C. Acromegaly

D. Diabetes

8. The primary target of the releasing and inhibiting hormones of the hypothalamus is the:

- A. Liver and adipose tissue
- B. Gonads
- C. Anterior pituitary
- D. Bone marrow

8. The primary target of the releasing and inhibiting hormones of the hypothalamus is the:

- A. Liver and adipose tissue
- B. Gonads
- C. Anterior pituitary**
- D. Bone marrow

9. Which of these is not an endocrine gland?

- A. Pancreas.
- B. Testes.
- C. Salivary gland.
- D. Parathyroid.

9. Which of these is not an endocrine gland?

- A. Pancreas.
- B. Testes.
- C. Salivary gland.**
- D. Parathyroid.

10. Lack of ADH causes diabetes insipidus. This drug may be prescribed to combat the disorder.

- A. Insulin
- B. Metformin
- C. Desomopressin
- D. Octreotide

10. Lack of ADH causes diabetes insipidus. This drug may be prescribed to combat the disorder.

A. Insulin

B. Metformin

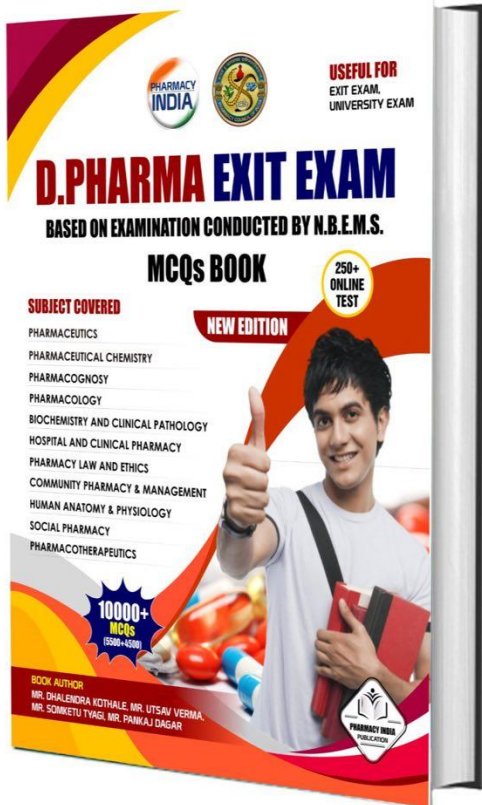

C. Desomopressin

D. Octreotide

11. Which of the following hormones are released from the anterior pituitary?

- A. Prolactin
- B. ADH
- C. TSH
- D. Oxytocin

11. Which of the following hormones are released from the anterior pituitary?

A. Prolactin

B. ADH

C. TSH

D. Oxytocin

12. Lack of glucocorticoids with primary causes would be attributed to which condition?

- A. Cushing's
- B. Hashimoto's
- C. Addison's
- D. Hyperthyroidism

12. Lack of glucocorticoids with primary causes would be attributed to which condition?

A. Cushing's

B. Hashimoto's

C. Addison's

D. Hyperthyroidism

13. Anti-obesity agents (orlistat) work by...

- A. Inhibiting lipase
- B. Stimulating lipase
- C. Inhibiting glucagon
- D. Stimulating glucagon

13. Anti-obesity agents (orlistat) work by...

A. Inhibiting lipase

B. Stimulating lipase

C. Inhibiting glucagon

D. Stimulating glucagon

14. The vagus nerve regulates major elements of which part of the nervous system?

- a) Parasympathetic nervous system
- b) Enteric nervous system
- c) Sympathetic nervous system
- d) Central nervous system

14. The vagus nerve regulates major elements of which part of the nervous system?

- a) **Parasympathetic nervous system**
- b) Enteric nervous system
- c) Sympathetic nervous system
- d) Central nervous system

15. Which organs are supplied from the sympathetic postganglionic axons coming from prevertebral ganglia?

- A. below the diaphragm
- B. only lower limbs
- C. above the diaphragm
- D. only upper limbs

15. Which organs are supplied from the sympathetic postganglionic axons coming from prevertebral ganglia?

A. below the diaphragm

B. only lower limbs

C. above the diaphragm

D. only upper limbs

16. What is other the name of parasympathetic division?

- A. thoracolumbar outflow
- B. thoracosacral outflow
- C. craniosacral outflow
- D. craniolumber outflow

16. What is other the name of parasympathetic division?

- A. thoracolumbar outflow
- B. thoracosacral outflow
- C. craniosacral outflow**
- D. craniolumber outflow

17. Which of the following structure is supplied with parasympathetic division?

- A. sweat glands
- B. blood vessels of skeletal muscle
- C. skin
- D. none of the above

17. Which of the following structure is supplied with parasympathetic division?

- A. sweat glands
- B. blood vessels of skeletal muscle
- C. skin
- D. none of the above**

18. Which of the following is not the type of prevertebral ganglia?

- A. celiac ganglia
- B. ciliary ganglia
- C. renal ganglia
- D. superior mesenteric ganglia

18. Which of the following is not the type of prevertebral ganglia?

- A. celiac ganglia
- B. ciliary ganglia**
- C. renal ganglia
- D. superior mesenteric ganglia

19. How does the two divisions of ANS work?

- A. works with similar effects
- B. works with opposite effect
- C. does not work together
- D. both A and B

19. How does the two divisions of ANS work?

A. works with similar effects

B. works with opposite effect

C. does not work together

D. both A and B

20. What effect occur on the trachea and bronchi during sympathetic stimulation

- A. Trachea and bronchi dilate
- B. remains constant
- C. trachea and bronchi constrict
- D. no effect

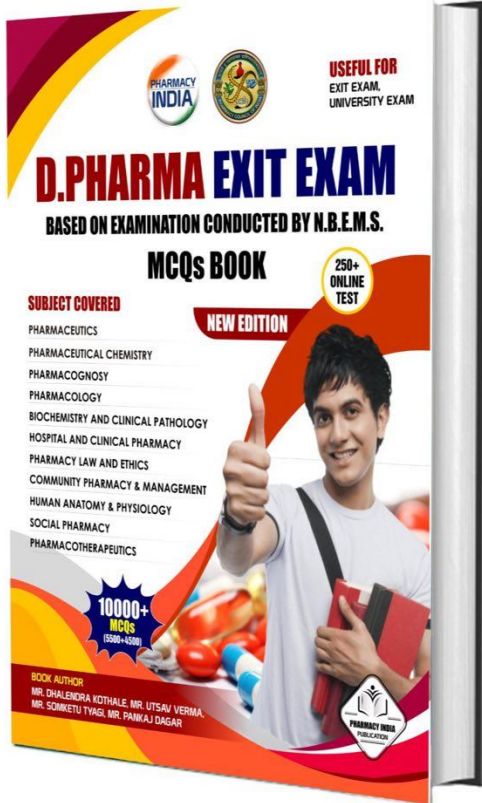

20. What effect occur on the trachea and bronchi during sympathetic stimulation

- A. Trachea and bronchi dilate
- B. remains constant
- C. trachea and bronchi constrict
- D. no effect

21. Which of the following blood corpuscles play role in blood clotting

- (a) WBC
- (b) Platelets
- (c) RBC
- (d) All of these

21. Which of the following blood corpuscles play role in blood clotting

(a) WBC

(b) Platelets

(c) RBC

(d) All of these

22. The blood plasma contains

- (a) 80% water
- (b) 91 % water
- (c) 65% water
- (d) 7% water

22. The blood plasma contains

- (a) 80% water
- (b) 91 % water**
- (c) 65% water
- (d) 7% water

23. Smooth muscles are found in

- (a) Heart
- (b) Viscera
- (c) Both a and b
- (d) Limbs

23. Smooth muscles are found in

(a) Heart

(b) Viscera

(c) Both a and b

(d) Limbs

24. Given the following which muscles are not under the involuntary control

- (a) Skeletal muscle
- (b) Cardiac muscle
- (c) Smooth muscle
- (d) All of these

24. Given the following which muscles are not under the involuntary control

- (a) Skeletal muscle
- (b) Cardiac muscle
- (c) Smooth muscle
- (d) All of these

25. Which of the following is not true

- (a) Arteries contain oxygenated blood and veins contain deoxygenated blood
- (b) Arteries have thicker walls than veins
- (c) BP is low in veins than arteries
- (d) BP is high in veins than arteries

25. Which of the following is not true

- (a) Arteries contain oxygenated blood and veins contain deoxygenated blood
- (b) Arteries have thicker walls than veins
- (c) BP is low in veins than arteries
- (d) BP is high in veins than arteries**

26. The duration of cardiac cycle is

- (a) 10 sec
- (b) 12 sec
- (c) 0.8 sec
- (d) None of these

26. The duration of cardiac cycle is

- (a) 10 sec
- (b) 12 sec
- (c) 0.8 sec**
- (d) None of these

27. The diastolic pressure is the

- (a) Minimum pressure
- (b) Maximum pressure
- (c) Both a and b
- (d) None of these

27. The diastolic pressure is the

(a) Minimum pressure

(b) Maximum pressure

(c) Both a and b

(d) None of these

28. Given the following which is the largest vein in the body

- (a) Femoral vein
- (b) Inferior vena cava
- (c) Superior vena cava
- (d) None of these

28. Given the following which is the largest vein in the body

- (a) Femoral vein
- (b) Inferior vena cava**
- (c) Superior vena cava
- (d) None of these

29. Baroreceptor is associated with

- (a) Control of respiration
- (b) Control of blood pressure
- (c) Control of heart rate
- (d) None of these

29. Baroreceptor is associated with

(a) Control of respiration

(b) Control of blood pressure

(c) Control of heart rate

(d) None of these

30. Given the following are the disorders of blood except

- (a) COPD
- (b) Sickle-cell anaemia
- (c) Hemoplilia
- (d) Thrombocycropenia

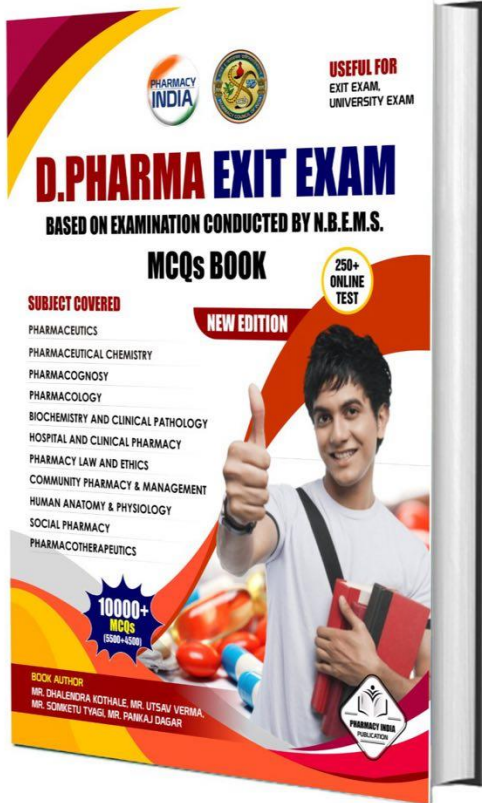

30. Given the following are the disorders of blood except

- (a) COPD**
- (b) Sickle-cell anaemia
- (c) Hemoplilia
- (d) Thrombocycropenia
