1. Tachycardia means

- a) Decrease Heart Rate
- b) Increase Heart Rate.**
- c) Increase Blood Pressure
- d) Decrease Blood Pressure

जुड़िए हमारे साथ **Type- DPINDIA** और भेज दीजिए **9389516306**

EXPLANATION:

- ✓ Tachycardia refers to a medical condition characterized by an abnormally rapid heart rate, typically defined as a heart rate greater than 100 beats per minute (bpm) in adults.
- ✓ During tachycardia, the heart beats at a faster-than-normal pace, which can lead to various symptoms such as palpitations, dizziness, shortness of breath, chest discomfort, and in severe cases, fainting or loss of consciousness.
- ✓ Tachycardia can be caused by various factors, including physiological stress, exercise, fever, dehydration, certain medications, hormonal imbalances, or underlying heart conditions such as arrhythmias, heart failure, or heart valve disorders.

2. Geographical distance between the sender & receiver communication is one of the most common in communication

- a) Gender Barriers
- b) Physical Barrier**
- c) Psychological Barriers
- d) Cultural Barriers

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ The geographical distance between the sender and receiver of communication is considered a physical barrier.
- ✓ Physical barriers are obstacles that arise due to the tangible aspects of the environment, such as distance, noise, time zones, or technological limitations.
- ✓ In the context of communication, geographical distance can pose challenges such as delays in message delivery, difficulties in establishing face-to-face interactions, or limitations in accessing communication channels.

- d) Qualified

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

3. Pharmacist has at least one year experience of providing pharmaceutical care to patients

- a) Registered
- b) Clinical**
- c) Chief
- d) Qualified

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ A pharmacist with at least one year of experience providing pharmaceutical care to patients would likely be described as a "Clinical" pharmacist.
- ✓ Clinical pharmacists are highly trained professionals who specialize in direct patient care, working closely with healthcare teams to optimize medication therapy and improve patient outcomes.
- ✓ They typically have advanced knowledge and skills in medication management, therapeutic decision-making, and patient counseling.

4. EPS stands for

- a) Electronics Practice system
- b) Electronics prescription support
- c) Electronics Problem Services
- D) Electronics Prescription Service**

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

EPS stands for Electronics Prescription Service.

- ✓ This is a service provided by the National Health Service (NHS) in the United Kingdom that allows prescriptions to be sent electronically from healthcare providers to pharmacies.
- ✓ It aims to streamline the prescription process, reduce paperwork, improve efficiency, and enhance patient convenience by enabling electronic transmission and processing of prescriptions.

- d) Remedium Constituens

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ Compounded prescriptions are also known as Formula Magistralis.
- ✓ This Latin term refers to medications that are prepared by a pharmacist according to a specific formula or recipe tailored to meet the unique needs of an individual patient.
- ✓ Compounded medications are custom-made to accommodate various factors such as specific dosages, dosage forms, or the exclusion of certain ingredients to address allergies or intolerances.

- d) Purchasing Process

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ SOPs (Standard Operating Procedures) provide additional information for the Pharmaceutical Practice.
- ✓ SOPs are detailed instructions that outline the standardized procedures and protocols to be followed in various aspects of pharmaceutical practice.
- ✓ These procedures cover a wide range of activities including dispensing medications, compounding preparations, managing inventory, ensuring quality control, handling hazardous materials, and maintaining regulatory compliance.

- a) Essential Drug Conjugate
- b) Emergency Drug Concept
- c) Essential Drug Concept**
- d) Essential during Counseling

जुड़िए हमारे साथ **Type- DPINDIA** और भेज दीजिए **9389516306**

EXPLANATION:

EDC stands for Essential Drug Concept.

- ✓ This concept emphasizes the importance of ensuring that essential drugs, which are medications that satisfy the priority health needs of the population, are available in adequate amounts, in appropriate dosage forms, with assured quality, and at affordable prices.
- ✓ The Essential Drug Concept aims to promote rational drug use, maximize the effectiveness of healthcare resources, and improve access to essential medications for all individuals within a community or population.

- b) Directly Observed Therapy**
- c) Directly Observed Technique
- d) Decrease Observed Therapy.

जुड़िए हमारे साथ **Type- DPINDIA** और **भेज दीजिए 9389516306**

EXPLANATION:

DOT stands for Directly Observed Therapy.

- ✓ This term is commonly used in the context of tuberculosis (TB) treatment.
- ✓ Directly Observed Therapy involves a healthcare provider observing the patient while they take their medication to ensure compliance with the prescribed treatment regimen.
- ✓ This approach helps to ensure that patients are taking their medication as directed, which is crucial for the successful treatment of TB and the prevention of drug resistance.

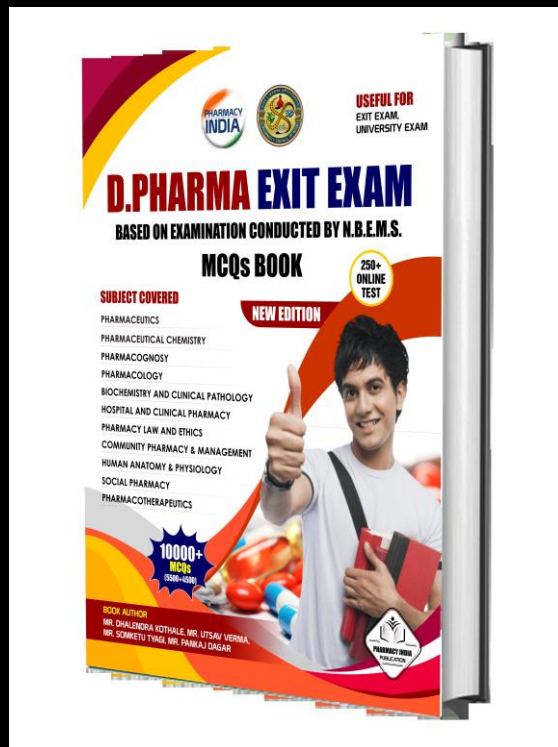

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ Hypertension, commonly known as high blood pressure, is not a disease itself but is an important risk factor for several complications that can lead to organ damage.
- ✓ When left untreated or poorly controlled, hypertension can contribute to various health issues, including cardiovascular diseases such as heart attacks, strokes, heart failure, and peripheral artery disease.
- ✓ Additionally, hypertension can damage blood vessels throughout the body, affecting organs such as the kidneys, eyes, and brain.

- c) Patient Counselling
- d) Medication Information Service

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

12. The quality of doctor-patient relationship is an important factor that influences

- a) Patient Medication Adherence
- b) Therapeutic Care
- c) Patient Counselling
- d) Medication Information Service

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ The quality of the doctor-patient relationship is a crucial factor that significantly influences patient medication adherence.
- ✓ When patients have a positive and trusting relationship with their healthcare providers, they are more likely to adhere to their prescribed medication regimen.
- ✓ A strong doctor-patient relationship fosters open communication, mutual respect, and shared decision-making, which can enhance patients' understanding of their medical condition and the importance of medication adherence.
- ✓ Patients are more likely to follow their doctor's recommendations when they feel supported, listened to, and involved in their healthcare decisions.

- a) Cervical Cancer
- b) Breast Cancer
- c) Prostate Cancer
- d) Colorectal Cancer

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ Breast cancer is a common malignancy among women. It occurs when abnormal cells in the breast tissue grow uncontrollably, forming a tumor.
- ✓ Breast cancer can affect women of all ages, although the risk increases with age.
- ✓ Various factors contribute to the development of breast cancer, including genetic predisposition, hormonal factors, lifestyle choices, and environmental exposures.
- ✓ Regular screening mammograms and early detection play a crucial role in the management and treatment of breast cancer.

- d) Diabetes**

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ Patients with diabetes are at a higher risk of colorectal cancer.
- ✓ Several studies have suggested a link between diabetes and an increased risk of developing colorectal cancer.
- ✓ The exact mechanisms underlying this association are not fully understood, but potential factors include chronic inflammation, insulin resistance, hyperinsulinemia, and alterations in insulin-like growth factors, all of which are common in individuals with diabetes.

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ Bacteria, viruses, and parasites are the most common causes of diarrhea.
- ✓ Diarrhea is a condition characterized by frequent and loose or watery bowel movements.
- ✓ It can be caused by various factors, including infections with bacteria (such as Escherichia coli, Salmonella, Campylobacter), viruses (such as norovirus, rotavirus, adenovirus), and parasites (such as Giardia, Cryptosporidium).
- ✓ These microorganisms can enter the body through contaminated food or water, poor hygiene practices, or close contact with infected individuals.

- b) 1964
- c) 1974
- d) 1984

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ The Health Belief Model (HBM) was developed in 1964 by social psychologists Hochbaum, Rosenstock, and Kegels, in response to the failure of a free tuberculosis health screening program.
- ✓ The model was designed to understand and predict health-related behaviors by examining the beliefs and perceptions of individuals regarding health threats and the benefits of taking preventive actions.
- ✓ It suggests that people's health-related behaviors are influenced by their perceived susceptibility to a health problem, perceived severity of the problem, perceived benefits of taking action to prevent or control the problem, perceived barriers to taking action, cues to action, and self-efficacy.

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ In prescription terminology, the heading of a prescription is known as the "Superscription."
- ✓ The superscription typically includes the symbol "Rx," derived from the Latin word "recipe," which means "take."
- ✓ This symbol traditionally indicates that the prescription is an instruction to the pharmacist to dispense medication.

- c) Eye contact
- d) Asking for clarification

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ Eye contact is an example of a non-verbal communication skill. Non-verbal communication involves conveying messages without the use of words, using gestures, facial expressions, body language, and eye contact, among other cues.
- ✓ Eye contact is a powerful form of non-verbal communication that can convey attentiveness, interest, sincerity, and confidence.
- ✓ When individuals make appropriate and consistent eye contact during conversations, it signals engagement, connection, and mutual understanding between communicators.

32. The history of community pharmacy in India starts with opening of Chemist shop in year

- a) 1811
- b) 1812
- c) 1813
- d) 1814

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

32. The history of community pharmacy in India starts with opening of Chemist shop in year

- a) 1811
- b) 1812**
- c) 1813
- d) 1814

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ The history of community pharmacy in India dates back to the opening of the first chemist shop in the year 1812.
- ✓ This marked the beginning of organized pharmaceutical services in India.
- ✓ Over the years, community pharmacies have played a crucial role in providing essential healthcare services, dispensing medications, and promoting public health initiatives.

33. The preparation of SOP's in pharmacy is responsibility of

- a) Staff Nurse
- b) Physician
- c) Pharmacist**
- d) None

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ The preparation of Standard Operating Procedures (SOPs) in pharmacy is the responsibility of pharmacists. SOPs are detailed instructions that outline the standardized procedures and protocols to be followed in various aspects of pharmaceutical practice.
- ✓ Pharmacists play a crucial role in developing SOPs to ensure consistency, accuracy, and safety in the delivery of pharmacy services.

a) Physician

b) Pharmacist

c) Staff nurse

d) None

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ The part of the prescription called "subscription" contains directions to the pharmacist.
- ✓ In this section, the prescribing healthcare provider provides specific instructions to the pharmacist regarding the medication to be dispensed to the patient.
- ✓ These instructions typically include details such as the name and strength of the medication, the dosage regimen (including dose and frequency), the quantity to be dispensed, and any special instructions or precautions.

35. Which of the following medicine is used for tuberculosis?

- a) INH
- b) Salbutamol
- c) Acetaminophen
- d) Metformin

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ INH, or Isoniazid, is a medication used for the treatment of tuberculosis (TB).
- ✓ It is one of the first-line drugs in the standard regimen for both active and latent TB infections.
- ✓ INH works by inhibiting the growth of Mycobacterium tuberculosis, the bacterium that causes TB, thereby helping to treat the infection and prevent its spread.

36. Communication is a part of skill

- a) Hard
- b) Soft**
- c) Tough
- d) Short

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ Communication is often considered a soft skill. Soft skills are non-technical skills that are related to how an individual interacts with others, communicates ideas, and collaborates effectively.
- ✓ Communication encompasses verbal, non-verbal, and written forms of expression, and it is essential for building relationships, resolving conflicts, conveying information, and achieving common goals.

37. Which of the following is called good cholesterol?

- a) LDL
- b) HDL
- c) VLDL
- d) TG

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

37. Which of the following is called good cholesterol?

- a) LDL
- b) HDL**
- c) VLDL
- d) TG

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ HDL stands for High-Density Lipoprotein. It is often referred to as "good" cholesterol because it helps to remove excess cholesterol from the bloodstream and transport it to the liver for excretion from the body.
- ✓ High levels of HDL cholesterol are associated with a lower risk of cardiovascular disease because HDL helps to prevent the buildup of plaque in the arteries, which can lead to heart disease and stroke.

40. Communication is a shared process between you, the patient, and his or her family.

a) TRUE

b) FALSE

जुड़िए हमारे साथ Type- DPINDIA और भेज दीजिए 9389516306

EXPLANATION:

- ✓ Communication in healthcare is indeed a shared process involving not only healthcare professionals like myself but also the patient and their family members or caregivers.
- ✓ Effective communication is essential for building trust, fostering collaboration, and ensuring that the patient receives the best possible care.
- ✓ It involves exchanging information, sharing concerns and preferences, discussing treatment options, and addressing any questions or uncertainties that the patient or their family may have.
